

PRODUCT REQUIREMENTS DOCUMENT

ChouFliya Wholesale Marketplace

Exact Feature Clone — choufliya.ma

Version	1.0.0
Date	April 30, 2026
Tech Stack	React + Node.js + MongoDB
Reference Site	https://choufliya.ma
Document Owner	Product Team
Status	Ready for Development

1. Executive Summary

This document is a complete Product Requirements Document (PRD) for building an exact clone of ChouFliya.ma — Morocco's largest wholesale marketplace for retailers. The goal is to replicate every feature, screen, user flow, and data model from the reference site using React (frontend), Node.js (backend), and MongoDB (database).

1.1 Product Vision

Build a wholesale marketplace platform where retailers can search for products using AI-powered image recognition, discover supplier stores organized by category, save favorites, build sourcing collections, and connect with wholesalers directly via Telegram and WhatsApp.

1.2 Key Statistics (from Reference Site)

Total Products	1,000,000+ products indexed
Total Suppliers	100+ wholesale stores
Total Stores Listed	163 stores
Search Speed	< 1 second
Fashion Category	819,095 products
Beauty Category	150,272 products
Primary Market	Morocco (MAD currency)
Languages	English (EN) — with multilingual support

1.3 Core User Types

- Retailer / Buyer — browses stores, searches products by image or text, saves favorites, builds collections
- Wholesaler / Supplier — lists their store, uploads products, connects with buyers via Telegram/WhatsApp
- Admin — manages platform, approves stores, handles support tickets

2. Tech Stack Architecture

2.1 Frontend — React

- React 18+ with React Router v6 (client-side routing)
- TailwindCSS for styling (green/orange brand colors: #1A7A5E, #E8820C)
- Axios for API calls
- React Query / TanStack Query for server state & caching
- Zustand or Redux Toolkit for global state (auth, user preferences)
- React Hook Form for all forms
- React Toastify for toast notifications
- i18next for internationalization (EN/FR/AR)
- Lucide-react or Heroicons for icon system

2.2 Backend — Node.js

- Node.js 20+ with Express.js REST API
- JWT (JSON Web Tokens) for authentication — access + refresh token pattern
- Passport.js with Google OAuth 2.0 strategy
- Multer + Cloudinary for image upload/storage
- OpenAI Vision API or custom vector search for AI image similarity
- Mongoose ODM for MongoDB
- Nodemailer for transactional emails
- Rate limiting via express-rate-limit
- Helmet.js for security headers
- CORS, compression middleware

2.3 Database — MongoDB

- MongoDB Atlas (cloud)
- Collections: users, stores, products, favorites, collections, support_tickets, search_history, notifications
- Indexes on: product category, store handle, price, date_posted
- Cloudinary for binary image storage

2.4 Infrastructure

- Vercel or Netlify for React frontend
- Railway, Render, or DigitalOcean for Node.js API
- MongoDB Atlas for database
- Cloudinary for media CDN

3. Site Structure & URL Routes

The following is the complete route map derived from the reference site video walkthrough:

URL Path	Access	Page Name
/	Public	Landing / Hero Page
/search	Public + Auth	Product Search Results
/search?category=X	Public + Auth	Category Search (filtered)
/groups	Public	Supplier Stores Directory
/groups?category=X	Public	Supplier Stores (filtered by category)
/groups/:storeHandle	Public	Individual Store Page
/trending	Public	Trend Radar Page
/login	Public (guest only)	Login / Sign-in Page
/login?redirect=/favorites	Public	Login with redirect
/register	Public (guest only)	Create Account Page
/favorites	Protected	Saved Favorites
/collections	Protected	Sourcing Collections List
/collections/:id	Protected	Single Collection Detail
/settings	Protected	Account Settings
/settings/profile	Protected	Profile Settings Tab
/settings/password	Protected	Password Settings Tab
/settings/privacy	Protected	Data & Privacy Tab
/support	Protected	Support Tickets
/about	Public	About Page

4. Screen-by-Screen Feature Specifications

4.1 Global Layout — Public Header (Unauthenticated)

Top Bar (Dark Green Background)

- Left: Phone number with phone icon → tel: link (+923180505202)
- Social media icons (Instagram, Facebook, LinkedIn, WhatsApp) → external links
- Right: 'About' text link, 'Help & Support' text link with shield icon

Main Navigation Bar (White Background)

- Left: ChouFliya logo — clickable → homepage (/)
- Center Nav Items:
 - Search (with search icon) → /search
 - Stores (with grid icon) → /groups
 - Trending (with radar icon) → /trending
 - Become a Supplier (orange pill button, cart icon) → opens WhatsApp
- Right Side:
 - Country / Language selector: 'GB EN ▾' dropdown
 - Favorites icon (heart) — clicking redirects to /login?redirect=/favorites if not logged in
 - Account icon (person) with text 'Account' — opens login if not logged in

4.2 Global Layout — Authenticated Sidebar

Sidebar Navigation (Left, Collapsible)

- ChouFliya logo top-left
- MENU section:
 - Search (magnifier icon) → /search
 - Stores (grid icon) → /groups
 - Trend Radar (radar icon) → /trending
 - Collections (layers icon) → /collections
 - Favorites (heart icon) → /favorites
- ACCOUNT section:
 - Settings (gear icon) → /settings
 - Support (headset icon) → /support
 - + Add a Wholesaler (plus icon) → triggers WhatsApp flow
 - Collapse (double chevron) — collapses sidebar to icon-only mode
- Bottom: User avatar + full name (e.g. 'Muhammad Awais')
- Top-right header bar (authenticated): Country/Language selector, bell notification icon, user avatar + dropdown chevron

4.3 Landing Page (/) — Hero Section

Layout

- Two-column layout: Hero text left, Interactive demo right

Left Column

- Pill badge: green dot + 'Morocco's largest wholesale marketplace for retailers MA'
- Headline: 'Got a picture of a product?' (dark/bold)
- Sub-headline: 'We'll find every supplier who sells it' (orange/bold/large)
- Body text: 'Skip the trip to wholesale markets. Just upload an image and see every wholesaler selling the same product, with prices and direct links.'
- Search bar: text input with placeholder 'Search by text or upload an image...' + image upload icon
- Search CTA: Large dark green button 'Search' with magnifier icon

Right Column — Interactive Demo Widget

- Browser-frame mockup showing choufliya.ma/search URL
- Shows: 'AI-powered image analysis' label + result count ('156 results from 28 suppliers') + timing badge (0.8s)
- Below: Animated supplier match cards showing:
 - Store thumbnail image, Store name, Match percentage (100%, 95%), Product count ('15 similar products'), Price in MAD (e.g. 40 MAD, 35 MAD)
- The animation cycles through product examples automatically

Stats Bar (below hero)

- 1M+ products
- 100+ wholesalers
- <1s search speed
- 'Your account is safe, SSL encrypted' trust badge

4.4 Search Page (/search)

Page Header

- Page title: 'Search'
- Breadcrumb category indicator: icon + category name in Arabic/French + product count (e.g. '272,218 products')
- 'With price only' toggle filter — right-aligned pill toggle

Filter Bar

- STORE dropdown: 'All stores (116)' — searchable dropdown listing all supplier stores
- SORT BY dropdown: Options: 'Newest first', 'Oldest first', 'Price: Low to High', 'Price: High to Low'
- FROM DATE date picker (dd/mm/yyyy format with calendar icon)
- TO DATE date picker (dd/mm/yyyy format with calendar icon)

Product Grid

- 4-column responsive grid (2 on tablet, 1 on mobile)
- Each product card contains:
 - Product image (square aspect ratio, object-fit cover)
 - Date posted (e.g. '29 Apr 2026')
 - Store name / handle
 - Price in MAD (if available)
 - Heart icon (add to favorites) — top-right of image
 - Clicking image → links to store or image detail
- Infinite scroll or pagination at bottom

Image Search Feature

- Clicking camera/upload icon in search bar opens file picker
- Upload a product image → backend performs AI visual similarity search
- Results show: match percentage, supplier name, price, number of similar products
- Search result speed shown (e.g. '0.8s')

Category-filtered Search

- URL: /search?category=women_clothing
- Category pill shown with count and 'x' to remove filter
- Store filter updates to show stores within that category

4.5 Supplier Stores Page (/groups)

Page Header

- Icon + 'Supplier Stores' heading
- Subheading: 'Browse all available stores'
- '+ Add a Wholesaler' CTA button (dark green, top-right) → WhatsApp flow

Left Sidebar — Category Filter

- 'Categories' label with layers icon
- Hierarchical category tree with item counts:

- All — 1,346,406
- Furniture — 45,957 (expandable: Sofas 1,512, Tables 5,083, Chairs 6,355, Beds 1,897, Wardrobes 12,799, Shelves & Storage 18,311)
- Fashion — 819,095
- Home Decor — 31,647
- Kitchen & Dining — 78,950
- Electronics — 32,572
- Beauty — 150,272
- Kids & Babies — 47,943
- Home & Living — 49,254
- Active category highlighted in green
- Subcategories shown with chevron expand/collapse

Main Content Area

- Search stores input: 'Search stores...' with magnifier icon
- Sort dropdown: 'Most products' (default) | 'Most followers' | 'Newest'
- Total count label: 'X stores available'
- When category selected: 'X stores available · Y imgs' label shown
- Active filter tag with 'x' to remove (e.g. 'Sofas x')

Store Card

- Multi-image collage (2x2 grid of product thumbnails from that store)
- Store logo / avatar in bottom-left corner of collage
- Store name (truncated with '...' if long)
- Store handle (@username)
- Product count (image icon + number, e.g. 142,139)
- Follower count (people icon + number, e.g. 2,042)
- Telegram icon button → opens Telegram link
- WhatsApp icon button → opens WhatsApp link
- Clicking card → navigates to /groups/:storeHandle
- Scroll-to-top floating button (bottom-right, green circle with up arrow)

4.6 Login / Sign-In Page (/login)

Layout — Two Column

- Left column: Dark green background with marketing content
 - ChouFliya logo (white)
 - CHOUFLIYA label (all caps, orange/yellow)
 - Headline: 'Morocco's largest wholesale platform'
 - Body: 'Snap any product and find every wholesaler selling it, in seconds. No middlemen.'
 - 3 stat boxes: '1M+ products', '100+ wholesalers', '<1s search speed'
 - Trust badge: shield icon + 'Your account is safe, SSL encrypted'
- Right column: White authentication form

Authentication Form

- 'Sign in to Morocco's largest wholesale platform' heading
- 'Sign in with Google' button (Google G icon + text)
- Divider: 'OR CONTINUE WITH EMAIL'
- Email input field (labeled)
- Password input field with show/hide toggle eye icon
- 'Forgot password?' link (right-aligned)
- 'Sign In' CTA button (dark green, full width)
- 'Don't have an account? Create one' link at bottom

Google OAuth Flow

- Clicking 'Sign in with Google' opens Google OAuth popup
- User selects or enters Google account
- On success → JWT tokens issued, user redirected to redirect param or /search
- Account auto-created on first Google sign-in

4.7 Favorites Page (/favorites)

Header

- Heart icon + 'Favorites' heading
- 'X images saved' subheading (updates dynamically)

Empty State

- Large grey heart icon centered
- 'You don't have any favorites yet'
- 'Search results you like will appear here.'
- 'Start Searching' CTA button (dark green)

Populated State

- Grid of saved product images (same layout as search results)
- Each card shows: image, date saved, store name, price
- Heart icon (filled red) on each card — click to remove from favorites
- Hover/tap: shows 'Remove from favorites' tooltip

4.8 Collections Page (/collections)

Header

- Layers icon + 'Collections' heading
- 'Organize your sourcing into lists' subheading
- '+ New Collection' button (dark green, top-right)

Collection Cards Grid

- Each collection card shows:
 - Color accent strip at bottom of card (matches chosen color)
 - Large stacked layers icon (placeholder if no items)
 - Collection name (bold)
 - Collection description (muted text, truncated)
 - Item count with icon ('X items')
- Clicking card → /collections/:id (shows items in collection)

Create Collection Modal

- Modal dialog with white card, rounded corners
- 'Create Collection' heading
- NAME input field (text, required, placeholder 'dresses')
- DESCRIPTION textarea (multiline, placeholder 'i well...')
- COLOR picker: 8 color swatches (purple, pink, orange, green, blue, dark-purple, red, teal)
- Selected color shows border/ring highlight
- 'Cancel' button (ghost/outline)
- 'Create Collection' button (dark green, primary)
- On success: toast notification 'Collection saved!' (green with checkmark, top-right)
- On success: modal closes, new collection card appears in grid

4.9 Settings Page (/settings)

Header

- Gear icon + 'Settings' heading
- Subheading: 'Manage your account, password and personal data'

Tab Navigation

- Tab 1: Profile (person icon)
- Tab 2: Password (key icon)
- Tab 3: Data & Privacy (shield icon)

Profile Tab

- Avatar upload (circular image, click to change)
- Full name input
- Email input (may be locked for Google OAuth users)
- 'Save changes' button

Password Tab

- Current password input
- New password input
- Confirm new password input
- Password strength indicator
- 'Update Password' button
- (Disabled/hidden for Google OAuth accounts)

Data & Privacy Tab

- 'Download Your Data' section:
 - Description: 'Get a JSON file with all your account data, favorites, and search history.'
 - 'Download my data' button (blue, with download icon)
 - INCLUDES: Account info, Favorites, Search history
- 'Delete Account' section (red/danger):
 - Warning icon + 'Delete Account' heading
 - 'Permanently delete your account and all data. This action cannot be undone.'
 - 'Delete my account' danger button
 - Confirmation modal with 'Type DELETE to confirm' input field

4.10 Support Page (/support)

Header

- Headset icon + 'Support' heading
- 'How can we help you?' subheading
- '+ New Ticket' button (dark green, top-right)

Filter Tabs

- Tab options: All | Open | In Progress | Closed
- Active tab highlighted in dark green with white text

Empty State

- Ticket/receipt icon centered
- 'No tickets yet' heading
- 'Open your first ticket' CTA button

Ticket Cards (populated state)

- Ticket title
- Ticket status badge (Open / In Progress / Closed)
- Creation date
- Last reply snippet

Create New Ticket Modal

- 'New Support Ticket' heading
- Subject input field
- Category dropdown (e.g. Technical Issue, Billing, General)
- Message textarea
- File attachment option

- 'Submit Ticket' button

Global Feedback Button

- Floating button: chat bubble icon + 'Feedback' text, bottom-right corner, dark green
- Present on all authenticated pages
- Opens feedback form modal

5. WhatsApp & Telegram Integration

5.1 'Become a Supplier' / 'Add a Wholesaler' Flow

When a user clicks 'Become a Supplier' (in nav) or '+ Add a Wholesaler' (in sidebar), the app opens a WhatsApp Web link with a pre-filled Arabic registration message sent to the ChouFliya business number (+212663196114).

Pre-filled WhatsApp Message Template (Arabic)

URL: [https://api.whatsapp.com/send?phone=212663196114&text=\[Arabic message\]](https://api.whatsapp.com/send?phone=212663196114&text=[Arabic message])

- Message contains: store name field, Telegram channel field, city field, category field
- Link opens WhatsApp app (mobile) or WhatsApp Web (desktop)

5.2 Store-Level Telegram & WhatsApp Links

- Each store card shows Telegram icon button (blue) → opens t.me link for that store's channel
- Each store card shows WhatsApp icon button (green) → opens WhatsApp for that store
- Links sourced from store profile data in MongoDB

6. MongoDB Data Models

6.1 User

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated MongoDB ID
email	String	Yes	Unique email address
password	String (hashed)	No	Null for OAuth users, bcrypt hashed
name	String	Yes	Full display name
avatar	String (URL)	No	Profile picture URL (Cloudinary)
authProvider	String	Yes	'local' or 'google'
googleId	String	No	Google OAuth ID
role	String	Yes	'buyer', 'supplier', or 'admin'
country	String	No	Country code (e.g. 'MA', 'GB')
language	String	No	Language code (e.g. 'en', 'fr')
isVerified	Boolean	Yes	Email verification status
notifications	Array	No	Notification objects
createdAt	Date	Yes	Account creation timestamp
updatedAt	Date	Yes	Last update timestamp

6.2 Store

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
name	String	Yes	Display name of the store
handle	String	Yes	Unique @username (e.g. 'amiinhmo')
ownerId	ObjectId (ref: User)	Yes	Reference to owning user
description	String	No	Store description
avatar	String (URL)	No	Store profile image
coverImages	Array<String>	No	Product collage thumbnails
categories	Array<String>	Yes	e.g. ['Fashion', 'Women Clothing']
city	String	No	City of operation
telegramLink	String	No	Full t.me URL
whatsappLink	String	No	WhatsApp contact link
productCount	Number	No	Cached product count
followerCount	Number	No	Cached follower count
isApproved	Boolean	Yes	Admin approval status
createdAt	Date	Yes	Registration timestamp

6.3 Product

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
storeId	ObjectId (ref: Store)	Yes	Owning store
imageUrl	String	Yes	Primary product image (Cloudinary URL)
imageVector	Array<Number>	No	AI embedding vector for similarity search
price	Number	No	Price in MAD (null if not listed)
currency	String	No	Default 'MAD'
category	String	No	Product category
subcategory	String	No	Product subcategory
description	String	No	Optional product description
tags	Array<String>	No	Search tags
datePosted	Date	Yes	Timestamp when product was added
isActive	Boolean	Yes	Soft-delete flag

6.4 Collection

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
userId	ObjectId (ref: User)	Yes	Owner of this collection
name	String	Yes	Collection name (e.g. 'dresses')
description	String	No	Free-text description
color	String	Yes	Hex color code (e.g. '#E8820C')
items	Array<ObjectId>	No	References to Product IDs
itemCount	Number	No	Cached count of items
createdAt	Date	Yes	Creation timestamp

6.5 Favorite

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
userId	ObjectId (ref: User)	Yes	User who saved this
productId	ObjectId (ref: Product)	Yes	Saved product

savedAt	Date	Yes	When it was saved
----------------	------	-----	-------------------

6.6 Support Ticket

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
userId	ObjectId (ref: User)	Yes	Ticket creator
subject	String	Yes	Ticket subject
category	String	No	'Technical', 'Billing', 'General'
message	String	Yes	Initial message body
status	String	Yes	'open', 'in_progress', 'closed'
replies	Array<Object>	No	Reply objects: {author, message, timestamp}
attachments	Array<String>	No	URLs to attached files
createdAt	Date	Yes	Ticket creation timestamp
updatedAt	Date	Yes	Last activity timestamp

6.7 Search History

Field	Type	Required	Description
_id	ObjectId	Yes	Auto-generated ID
userId	ObjectId (ref: User)	Yes	User who searched
query	String	No	Text search query
imageUrl	String	No	Uploaded image URL (for image search)
resultCount	Number	No	Number of results returned
category	String	No	Active category filter at time of search
searchedAt	Date	Yes	Timestamp of search

7. REST API Endpoints

All API endpoints are prefixed with /api/v1. Protected endpoints require Authorization: Bearer <jwt_token> header.

7.1 Authentication

Feature	Description	Priority
POST /auth/register	Register with email + password. Returns JWT tokens.	P0 - Critical
POST /auth/login	Login with email + password. Returns JWT access + refresh tokens.	P0 - Critical
POST /auth/google	Google OAuth callback. Creates or logs in user.	P0 - Critical
POST /auth/refresh	Exchange refresh token for new access token.	P0 - Critical
POST /auth/logout	Invalidate refresh token.	P0 - Critical
POST /auth/forgot-password	Send password reset email.	P1 - High
POST /auth/reset-password	Reset password with token from email.	P1 - High

7.2 Users

Feature	Description	Priority
GET /users/me	Get current authenticated user profile.	P0 - Critical
PATCH /users/me	Update name, avatar.	P1 - High
PATCH /users/me/password	Change password (local auth only).	P1 - High
GET /users/me/data-export	Download user data as JSON.	P2 - Medium
DELETE /users/me	Permanently delete account + all associated data.	P1 - High

7.3 Search

Feature	Description	Priority
GET /search?q=&category=&store=&sort=&from=&to=&priceOnly=	Text-based product search with filters.	P0 - Critical
POST /search/image	Upload an image, returns AI similarity matches with	P0 - Critical

	store, price, match %.	
GET /search/categories	Returns all categories with product counts.	P1 - High

7.4 Stores

Feature	Description	Priority
GET /stores?category=&sort=&q=	List all stores with filters. Returns count + store cards.	P0 - Critical
GET /stores/:handle	Get single store by @handle.	P0 - Critical
GET /stores/:handle/products	Get paginated products for a store.	P0 - Critical
GET /stores/categories	Get all categories with store counts.	P1 - High
POST /stores	Admin: Create a new store. (Protected: supplier/admin)	P1 - High
PATCH /stores/:id	Supplier: Update own store details.	P1 - High

7.5 Favorites

Feature	Description	Priority
GET /favorites	Get all favorites for current user.	P0 - Critical
POST /favorites	Add product to favorites. Body: { productId }.	P0 - Critical
DELETE /favorites/:productId	Remove product from favorites.	P0 - Critical

7.6 Collections

Feature	Description	Priority
GET /collections	Get all collections for current user.	P0 - Critical
POST /collections	Create new collection. Body: { name, description, color }.	P0 - Critical
GET /collections/:id	Get single collection with all items.	P0 - Critical
PATCH /collections/:id	Update collection name, description, color.	P1 - High
DELETE /collections/:id	Delete collection.	P1 - High
POST /collections/:id/items	Add product to collection. Body: { productId }.	P0 - Critical
DELETE	Remove product from collection.	P1 - High

/collections/:id/items/:productId		
-----------------------------------	--	--

7.7 Support

Feature	Description	Priority
GET /support/tickets	Get user's support tickets. Filterable by status.	P1 - High
POST /support/tickets	Create new support ticket.	P1 - High
GET /support/tickets/:id	Get single ticket with replies.	P1 - High
POST /support/tickets/:id/reply	Add reply to ticket.	P1 - High

7.8 Feedback

Feature	Description	Priority
POST /feedback	Submit platform feedback. Body: { message, rating }.	P2 - Medium

8. AI-Powered Image Search — Technical Spec

8.1 Feature Overview

The core differentiating feature of ChouFliya is AI-powered visual product search. A user uploads any product photo and within <1 second sees all wholesalers selling that exact product, with prices and match percentages.

8.2 Implementation Options

Option A — OpenAI Vision + Vector Search (Recommended)

1. User uploads product image to POST /search/image
2. Backend sends image to OpenAI GPT-4 Vision to generate a text description + product tags
3. Generate embedding vector using OpenAI text-embedding-ada-002
4. Store vectors in MongoDB Atlas Vector Search index on Product.imageVector
5. Query: \$vectorSearch against all product embeddings
6. Return top N matches grouped by store, sorted by match score

Option B — Google Cloud Vision API

7. Use Google Vision API for product search and label detection
8. Match labels against product tags in MongoDB
9. Rank by most matching labels

8.3 Response Format

```
{ "total": 156, "stores": 28, "searchTime": "0.8s", "results": [ { "storeId": "...",  
  "storeName": "Jemal Darb Omar", "matchScore": 100, "price": 40, "currency": "MAD",  
  "similarProducts": 15, "imageUrl": "..." } ] }
```

8.4 Performance Requirements

- Image upload: max 10MB, formats: JPG, PNG, WEBP
- Search response time: < 1 second (target, shown to user)
- Fallback: text search if image analysis fails
- Rate limiting: 20 image searches per hour per unauthenticated user, 100 per authenticated user

9. UI Design System

9.1 Color Palette

Name	Hex Value	Usage
Primary Green	#1A7A5E	Main CTA buttons, active states, headings, sidebar
Dark Green (BG)	#1E3A30	Login left panel, sidebar dark variant, stat boxes
Orange / Amber	#E8820C	Sub-headings, 'Become a Supplier' button, category accent
Light Green BG	#E8F5F0	Table header backgrounds, info boxes
Light Gray BG	#F5F5F5	Alternating table rows, form backgrounds
White	FFFFFF	Main content backgrounds, cards
Text Dark	#1A1A1A	Primary body text, headings
Text Medium	#444444	Secondary text, labels
Text Muted	#888888	Placeholder text, disabled states
Border	#CCCCCC	Table borders, input borders, dividers
Danger Red	#CC0000	Delete account, P0 critical, error states

9.2 Typography

- Primary Font: Arial (system-safe fallback)
- Hero Headline: 36–48px, Bold, Dark (#1A1A1A)
- Orange Sub-headline: 32–40px, Bold, Orange (#E8820C)
- H1: 28px Bold, Green
- H2: 24px Bold, Dark Green
- H3: 20px Bold, Green
- Body: 16px Regular, Text Medium
- Labels: 14px Medium, Text Muted
- Badge/Tag: 12px Medium

9.3 Component Library

- Buttons: Primary (green), Secondary (outline green), Danger (red), Ghost
- Forms: Input, Textarea, Select dropdown, Date picker, Toggle switch
- Cards: Store card, Product card, Collection card, Stat card
- Modals: Create Collection, Confirm Delete, New Ticket, Feedback
- Navigation: Public top navbar, Authenticated sidebar (collapsible)
- Badges: Category pill, Status badge (Open/Closed/In Progress), Match % badge
- Toast notifications: Success (green), Error (red), Info (blue)
- Empty states: Icon + heading + CTA button

- Loading states: Skeleton loaders for product grids and store cards
- Image upload: Drag-and-drop zone with preview

10. Feature Priority Matrix

Feature	Description	Priority
Landing Page / Hero	Full hero with search bar, demo widget, stats bar	P0 - Critical
Text Search	Search products by keyword, filters (store, sort, date, price)	P0 - Critical
Image Search (AI)	Upload photo → find matching suppliers, prices, match %	P0 - Critical
Supplier Stores	Directory with category sidebar, store cards, search/sort	P0 - Critical
Category Filtering	Hierarchical category tree with product counts	P0 - Critical
Store Page	Individual store with product grid	P0 - Critical
Auth — Email	Register/login with email + password + forgot password	P0 - Critical
Auth — Google OAuth	Sign in with Google OAuth 2.0	P0 - Critical
Authenticated Sidebar	Collapsible sidebar with all nav items + user profile	P0 - Critical
Favorites	Save/remove products, view all saved, empty state	P0 - Critical
Collections	Create, view, delete collections; add items; color picker	P0 - Critical
Settings — Profile	Edit name, avatar	P1 - High
Settings — Password	Change password	P1 - High
Settings — Privacy	Download data JSON, delete account with confirmation	P1 - High
Support Tickets	Create, view, filter by status, reply	P1 - High
WhatsApp Integration	Pre-filled WhatsApp link for becoming a supplier	P1 - High
Telegram Links	Per-store Telegram channel links	P1 - High
Trend Radar Page	Trending products/categories view	P1 - High
Feedback Widget	Floating feedback button + form modal	P2 - Medium
Notifications	Bell icon + notification list	P2 - Medium
Language/Country Selector	GB/EN dropdown toggle	P2 - Medium
Data Export (JSON)	Download account data as JSON file	P2 - Medium
Scroll-to-top Button	Floating green circle arrow (stores page)	P3 - Low
Admin Panel	Approve stores, manage users, view analytics	P3 - Low

11. Non-Functional Requirements

11.1 Performance

- Page load (initial): < 2 seconds on 4G
- Image search response: < 1 second (shown to user as metric)
- Product grid: virtualized rendering for 1M+ products
- Store list: pagination (20 stores per page) or infinite scroll

11.2 Security

- HTTPS everywhere (SSL encrypted — shown as trust badge)
- JWT tokens: access token 15min, refresh token 7 days
- Passwords: bcrypt with salt rounds 12
- Input sanitization on all user inputs
- File upload validation (type, size, virus scan)
- Rate limiting on search, auth, and upload endpoints
- CORS configured for frontend domain only

11.3 Responsiveness

- Mobile-first responsive design
- Desktop: full sidebar layout
- Tablet: collapsed sidebar, 2-column product grid
- Mobile: bottom navigation bar, 1-column product grid

11.4 Internationalization (i18n)

- Primary language: English (EN)
- Secondary languages: French (FR), Arabic (AR — RTL support)
- Country/currency: Morocco (MAD), can extend to other countries
- Date format: dd/mm/yyyy

11.5 Accessibility

- WCAG 2.1 AA compliance
- Keyboard navigation for all interactive elements
- Screen reader labels on all icons and images
- Color contrast ratio minimum 4.5:1

12. Implementation Phases

Phase 1 — Foundation (Weeks 1–3)

10. Project setup: React app (Vite), Node.js API (Express), MongoDB Atlas connection
11. Authentication: email/password registration, login, JWT, Google OAuth
12. Landing page: full hero section with search bar UI (no AI yet)
13. Database: User, Store, Product, Favorite, Collection schemas
14. Basic store directory: /groups with category sidebar and store cards

Phase 2 — Core Features (Weeks 4–6)

15. Text search with all filters (store, sort, date range, price only)
16. AI image search integration (OpenAI Vision or Google Vision)
17. Category filtering with subcategories and counts
18. Favorites: save, remove, view page
19. Collections: create (with modal + color picker), view, add items

Phase 3 — User Account (Weeks 7–8)

20. Settings pages: Profile, Password, Data & Privacy tabs
21. Data export (JSON download)
22. Account deletion with confirmation
23. Support tickets: create, view, filter, reply
24. Feedback widget (floating button + modal)

Phase 4 — Polish (Weeks 9–10)

25. Responsive design (mobile/tablet breakpoints)
26. Trend Radar page
27. Notifications system
28. Language/country selector
29. Performance optimization (caching, lazy loading, skeleton states)
30. End-to-end testing

13. Acceptance Criteria

The build is considered complete when all of the following are verified:

- Public user can visit / and see hero, stats, and working search bar
- User can search by text and see product grid with all 4 filters working
- User can upload a product image and receive AI match results with store names, match %, and prices
- User can browse /groups and see all 163+ stores with category filters
- User can click any category subcategory and see filtered store + product count
- User can register with email or Google OAuth
- Logged-in user sees sidebar navigation with all 5 menu items + 3 account items
- User can save products to Favorites and see them on /favorites
- User can create a Collection with name, description, and color
- User can add products from search results to a collection
- Settings page shows Profile, Password, and Data & Privacy tabs — all functional
- 'Download my data' downloads a valid JSON file with account info, favorites, search history
- 'Delete Account' flow works with confirmation input and actually deletes data
- Support page allows creating tickets and filtering by status
- Feedback floating button is present on all authenticated pages
- 'Become a Supplier' / '+ Add a Wholesaler' opens WhatsApp with pre-filled Arabic message
- Each store card has working Telegram and WhatsApp icon links
- Site is fully responsive on mobile (320px+), tablet (768px+), and desktop (1280px+)
- SSL/HTTPS enforced in production
